

Cardiac Arrest Survivor Alliance

Hope. Healing. Home.

A Program of  Sudden Cardiac Arrest Foundation

ONE COMMUNITY FOR ALL AFFECTED BY CARDIAC ARREST

Cardiac Arrest Survivor Alliance™ brings together people affected by cardiac arrest, including survivors, families, and advocates. CASA provides science-based information, peer support, and access to experts, so members can recover, re-engage and thrive.

Sudden cardiac arrest is a leading cause of death in the U.S., affecting about 1,000 people in community settings each day. Only 1 in 10 victims survives. Those who do survive—and their co-survivors—often have cognitive, physical and psychological issues and need reliable information and support.

Why Join?

If you have been impacted by cardiac arrest or want to help those who have been affected, you are welcome here. We value your experience, insights, and perspectives. Together, we will support survivors and their loved ones on their journeys forward.

Why Us?

CASA is a program of the Sudden Cardiac Arrest Foundation, a nationally recognized nonprofit founded in 2005. CASA program leaders include leading researchers and clinicians with expertise in post-resuscitation quality of life.
